

# HyPearls®

## PRODUCT INFORMATION

HyPearls® combine exfoliation and hydration in one step. Incorporated in high quality cosmetic products, HyPearls® function as a scrubbing agent, replacing micro plastics. In a second step, Hyaluronic acid is released for optimized skin hydration. This content of Hyaluronic Acid per dose is flexible. HyPearls® are ready for direct mixing in versatile cosmetic products. Through modern technologies, hyaluronic acid is transferred into HyPearls® without further excipients - enabling a new generation of cosmetic products by design, user experience and functionality.

## THE BEST FOR SKIN. CREATED WITH INNOVATIVE TECHNOLOGY.

- ➔ Dual skin support: exfoliation and hydration
- ➔ 91% hyaluronic acid
- ➔ Microbiological analysis
- ➔ purity lab tested
- ➔ Unlimited scalability
- ➔ Available as bulk product
- ➔ Long shelf life

## OPTIMIZED FOR NEW PRODUCT OPPORTUNITIES.

The dual skin support boosts consumer compliance by offering curiosity and efficiency to the consumer. Cosmetic products with HyPearls® have dual benefits streamlining skincare routines and saving time. This multifunctional approach meets multiple needs in a single application, reducing the number of products required and minimizing the effort of incorporating several steps.
