

Vaccine Adjuvants

Aluminum Hydroxide Gels (Alum) for Animal Health

User Guide

SPI Pharma has extensive experience and knowledge of aluminum hydroxide chemistry, with more than 70 years for antacid forms and more than 20 years for VAC gels as a vaccine adjuvant. This expertise provides consistency throughout our products in terms of compliance, morphology, particle size distribution, and protein adsorption capacity.

Description

White to almost white translucent viscous colloidal gel (pumpable), used as a vaccine adjuvant

Retest Date: 3 years from the date of manufacture

Storage: Protect from excessive temperature and from freezing

SPI Pharma's vaccine adjuvants are used to help eliminate highly contagious and multiple species diseases such as Foot and Mouth, Classical Swine Fever, Anthrax, Aujeszky's, and several more. Our adjuvants enable vaccines to eradicate disease, secure food supply, reduce the threat of disease transmission, and/or improve the health of livestock and pets. We offer customized technical service and support- with skilled pharmacists and chemists offering assistance in troubleshooting and analysis.
